EDUCATION

High School

High School Attended:	Dannhauser Secondary School Dannhauser, South Africa
Subjects Done:	IsiZulu, Geography, Life Orientation, Mathematics, Physical Science, Life Science, English
Achievements	Part of the top 5 performing learners with 5 distinctions

Tertiary Education

Institution:	University of the Witwatersrand Johannesburg, South Africa
Course:	Bachelor of Science in Computer Science and Information Systems
Achievements:	

- 2020 Certificate of first-Class Basic computer Organization I(Coms1015)
- 2020 Certificate of first-Class Algebra I(Math1034)
- 2020 Certificate of first-Class Calculus I(Math1036)
- 2021 Certificate of first-Class Linear Algebra II

CERTIFICATIONS

- | | |
|---|----------------|
| - AWS Cloud Practitioner Certified | September 2023 |
| - Plan and Execute the Perfect Sprints in Agile and Scrum | April 2025 |
| - Currently Studying towards Azure fundamentals certification | |

WORK EXPERIENCE

First National Bank | Johannesburg

Backend Software Developer

15 January 2025-Present

Role Description

- Designed, developed, and maintained secure, scalable backend applications using Java.
- Built and consumed RESTful APIs to enable seamless integration between banking systems and third-party services.
- Managed database design, development, and optimization using SQL, ensuring data integrity and high-performance transactions.
- Utilized Liquibase for database version control, schema migration, and deployment consistency across environments.
- Implemented secure coding practices and adhered to banking industry standards for data protection and regulatory compliance.
- Collaborated with cross-functional teams, including Business Analysts, QA Engineers, and DevOps teams, to deliver high-quality solutions.
- ☑ Participated in code reviews, troubleshooting, debugging, and performance tuning of backend services.
- Developed and maintained integration solutions for core banking systems, payment platforms, and customer-facing applications.
- Created technical documentation and supported deployment activities throughout the software development lifecycle (SDLC).

Kula Partners Wellness Pty Ltd | Johannesburg

Data Analyst

1 October 2024-31 December 2024

Role Description

- Prepared and distributed monthly, quarterly, bi-annual, and annual reports to support business decision-making.
 - Analyzed and interpreted large datasets using Microsoft Excel and Power BI, leveraging advanced features such as PivotTables, lookups, and complex formulas to identify trends, patterns, and performance metrics, enabling effective business reporting and decision-making.
 - Developed and maintained interactive Power BI dashboards and reports for stakeholders and management.
 - Collected, cleaned, validated, and transformed data to ensure accuracy and consistency across reports.
 - Monitored key business metrics and provided actionable insights to support operational and strategic objectives.
 - Collaborated with cross-functional teams to understand reporting needs and deliver data-driven solutions.
-

Synthesis Software Technologies Pty Ltd | Johannesburg

Full stack Software Engineer

16 January 2023-31 July 2024(Contract)

Role Description

- Collaborate with cross-functional teams to gather and analyze software requirements
- Design and implement scalable, high-performance applications using the .NET framework.
- Leverage Vue.js, React.js, HTML, CSS, and Typescript to create responsive and user-friendly front-end interfaces
- Work within an Agile development environment, participating in sprint planning, stand-ups, and retrospectives.
- Adapt to changing project requirements and contribute to agile ceremonies
- Identify and address performance bottlenecks in both the backend and frontend components.
- Implement optimization techniques to enhance application speed and efficiency.
- Work extensively with APIs, Confluent Cloud and Azure. Leverage confluent cloud to orchestrate consumers and producers for KSQLDB topics.
- Integrate external APIs and third-party services into the application architecture.
- Write unit tests to ensure code quality and bug free software.

Dannhauser Secondary School | Dannhauser (KZN)

Assistant Mathematics teacher

2020 May -2020 September (Contract)

Role Description

- Prepare class notes, activities and examples to work on class with learners
- Teach and educate learners content prepared
- Make sure learners are understanding the work
- Give leaners activities to evaluate understanding

SOFTWARE PROJECTS WORKED ON

- **Ethics application Systems (C#,SQL,.Net Forms ,Visual studio)**

o Desktop application where students who are doing honors and coursework masters whose research involves human participants must get research ethics approval before conducting their research.

- **Handy Mike Application(C#,SQL,.Net ,Visual studio)**

o Working with my group in our company named All seasons technology we building an application for a businesswomen with a handyman business their business.

o The system will would allow users to login and be able to book/request a service on the app for a certain date instead of travelling miles just book and only to find out there's no spaces and It will allow the handyman to manage appointments

- **Wits academy application (Firebase, Android Studio, Java, HTML, CSS)**

o Application like Udemy that allows students or learners to subscribe to courses and learn online. Has two different users “Students and teachers” both have different interfaces.

o Teachers can login and create courses, post lectures and videos, and create announcements and quizzes. Students can login and subscribe to courses view announcements, and view and learn with content posted.

- **Lottery number generator (Android Studio, Java)**

o A application that generates lotto numbers for users

o Users can choose between lotto and Powerball and then get selected numbers

- **Social Media Texting App (Php, SQL, Java, Android Studio)**

o Texting App that allows people to send messages to each other and allows them to post statuses operates like WhatsApp but uses a lamp server to store messages.

- **Synth Bank (html, CSS, React, MongoDB, JavaScript, AWS)**

o A Banking app that uses an integrated Api to send and receive money to other apps through the Api. The app also has used a survey to identify type of personal acts & traits to what kind of person they are so it can be easily to identify odd behaviors in case of theft.
